FABRIC FLARE

When it comes to your furnishing Dhvani Shah, Design Specialist at Pepperfry says that vibrant linen crafted from light-coloured and cheerful fabrics, act as the perfect foil to tide over the rough weather. Sonam Gupta, Design Head at Tangerine believes that the colour turquoise is the safest bet and the finest hue, as it adds luxury and gives a soothing feel. Cushions and curtains or drapes in this serene colour will make for a perfect sight. Sonam instructs, "Furnishings in shades like ochre, amber, sepia and russet (dark brown) are great to perk up your home when it's pouring outside." Fabrics in shades of blue are also a hit for this season as they are not only soothing, but also symbolise the water element. If you are not much of a risk taker, opting for neutrals is always a safe bet. Additionally, you can also team neutrals with bright colours for the much needed pop of colour. Rajat Singhi, Founder of Address Home agrees saying, "To complement the drizzle outside, the brighter your linen is, the better it is."
